Re: Detectable Warnings  
Q-Lube Bonney Lake, Washington

Dear Mr. Julnes:

The City of Bonney Lake, Washington has inspected and approved the TILCO truncated domes installed for my client, Q Lube. The city and I were very pleased with the finished product. It is both functional and aesthetically pleasing.

While doing research on your product I looked at two sites in Bonney Lake, McDonald's and Ernst Hardware, that have install the truncated domes. Your product has passed the test of time in both of these well-traveled, weather beaten areas.

Please feel free use me as a reference in the future. Good luck on your potential work with the Bay Area Rapid Transit system. As a former Bay Area resident and a long time BART commuter, I know your truncated domes would be a great addition.

Sincerely,

Robert Pottorff
