Tod, ,just to let you know how you and your crews are doing.We couldn't be happier with the service your company has provided for us. We have a very demanding customer and you always pull through for us on short notice. Be it a large job or small. I would like to complement Scott on a job well done at the Conference Center . I know it's not easy giving up weekends to have to work , but he did an awesome job! I also want to thank-you for your work on the budget, I hope we get the green light on all of jobs we requested. Keep up the good work !
